

VVARDIS · HEALTHCARE · DENTAL

Dental practices and patients, **moving together**

A Swiss unicorn with a drill-free treatment for early caries: a new category in oral care. To make it the new standard, dental practices and patients have to move together. We designed, built and run **one system that connects both sides**: it finds the practices most ready to adopt, guides them from first discovery to the partnership pilot, and **brings patients who want the treatment into those same practices**. One data layer, from the first signal to the first treatment, **measured on adoption and revenue**.

THE COMPANY

A Swiss unicorn with a drill-free treatment for caries.

THE GOAL

Make it the new standard in dental practices.

THE SYSTEM WE BUILT

The path that takes dental practices from discovering the treatment to joining the pilot, and brings patients to those practices.

Practice targeting · Adoption journey · Sales handover · Patient demand · Local activation · B2B and B2C on one data layer · AI automation · Full-funnel attribution
