

(03) CRÉDIT AGRICOLE · FINANCE · BANKING

The infrastructure of an **innovation community**

One of Europe's largest banking groups runs an innovation community that brings its corporate clients together with the most promising startups: two very different audiences that must be found, engaged and kept active at the same time. We designed, built and run **the infrastructure behind the community**: startup scouting and selection, corporate engagement, creative production on every channel and **a journey automated from the first invitation to every milestone**, on one data layer, **at the scale of a banking group**.

THE COMPANY

One of Europe's largest banking groups.

THE GOAL

Grow its community of corporates and startups.

THE SYSTEM WE BUILT

The infrastructure of its innovation community: creative production, partner nurturing and startup recruitment.

Community experience design · Startup scouting and selection · Corporate engagement · Omnichannel creative production · Lifecycle automation · CRM · Engagement analytics
